SUMMARY

Full Stack Developer (MERN) with 6+ months of internship experience building production-grade systems — offline-first POS infrastructure, real-time event-driven APIs, and AI-integrated web apps. Proficient in React.js, Node.js, MongoDB, AWS, Redis, Socket.io, Docker, and CI/CD. Strong in DSA, system design fundamentals, and scalable architecture. Seeking a full-time Software Engineer / Full Stack Developer role.

EXPERIENCE

Restroworks

Jan 2026 – Mar 2026

MERN Stack Developer Intern

Delhi, India

- Engineered **offline-first sync** for POS systems using service workers and local data queuing, ensuring uninterrupted operations with seamless reconnect sync.
- Designed scalable **RESTful APIs** in Express.js/Node.js for order management, billing, inventory, and multi-outlet POS with structured error handling.
- Architected **event-driven real-time layer** via Socket.io handling concurrent order streams; optimized **MongoDB aggregation pipelines** reducing DB load by **30%+**.

Veersa Technologies

Oct 2025 – Dec 2025

Software Engineer Intern

Noida, India

- Built **3 full-stack projects** (React.js + Node.js) driving **12% user engagement increase**; reduced API response time **25%** via Redis caching and query optimization.
- Architected **event-driven task processing** with AWS Lambda and queue-based triggers, enabling scalable async operations and reducing peak API load by **10%**.
- Shipped **AI-integrated features** with cross-functional teams; authored Jest test suite achieving **35% increase in test coverage**, reducing post-deployment bugs significantly.

PROJECTS

Task Management App | *React, TypeScript, Node.js, Express.js, MongoDB, JWT, IndexedDB, Redis, Socket.io, AWS*

- Built **offline-first** architecture using IndexedDB enabling **80% functionality without internet**; background polling reduced data conflicts by **40%** on reconnect.
- Engineered **hybrid sync engine** (pending queue + polling) resolving **500+ data conflicts/week**; deployed on **AWS EC2** with Redis pub/sub for real-time task updates.
- Implemented **JWT role-based auth** (admin/member) with rate limiting, structured error handling, and S3 asset storage.

AI Shorts Generator | *React, Node.js, OpenAI API, Express.js, Vercel* | [Live](#)

- Developed **AI-powered video script generator** with custom OpenAI prompt pipeline; optimized rendering achieving **25% faster load times** with zero-downtime Vercel CI/CD.
- Designed responsive React UI with dynamic form state management, reducing input friction and improving session retention.
- Implemented **end-to-end content pipeline** (prompt → script → structured output) with input validation and reusable prompt templates, improving generation consistency and reducing failures by **20%**.

SmartFinance | *React, Node.js, MongoDB, OpenAI API, Express.js, JWT, Vercel* | [Live](#)

- Architected **AI-driven expense tracker** for **100+ users**; automated reminders cut late fees **15%**, OpenAI spending analysis helped users save **\$60+/month** (20% improvement).
- Built RESTful backend with **MongoDB aggregation** for real-time financial summaries and JWT-secured per-user data isolation.
- Integrated **AI-based financial insights engine** with categorized expense tagging and anomaly detection, enabling smarter budgeting decisions and improving user retention.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, C++, Python, SQL

Frontend: React.js, Redux, Context API, Tailwind CSS, HTML5, CSS3

Backend: Node.js, Express.js, REST APIs, Socket.io, JWT, Mongoose, Redis

Databases: MongoDB, MySQL

Cloud & DevOps: AWS (EC2, S3, Lambda, SQS), Docker, Git, GitHub Actions, Vercel, CI/CD, Postman

Concepts: Offline-first Architecture, System Design, DSA, OS, DBMS, Computer Networks, OOP, Agile/Scrum

EDUCATION

Bhagwan Parshuram Institute of Technology, Delhi

B.Tech, Computer Science | **CGPA: 8.9/10**

2022 – 2026
